

## Enable USB Host API support

1. adb pull /system/etc/permissions/tablet\_core\_hardware.xml
2. Update that file and create android.hardware.usb.host.xml as specified by Greg-q.

**android.hardware.usb.host.xml** contains the following lines:

```
<permissions>  
    <feature name="android.hardware.usb.host"/>  
</permissions>
```

3. adb push android.hardware.usb.host.xml /system/etc/permissions
4. Push handheld\_core\_hardware.xml or tablet\_core\_hardware.xml to permissions:  
adb push tablet\_core\_hardware.xml /system/etc/permissions
5. Reboot.
